

# Low costs make building a bargain

Not only will Cal Poly be getting a new engineering building, but it's coming with a 23-percent discount.

The \$5,839,000 bid submitted by R.G. Fisher Constructors of Fresno was the lowest of eight proposals received by the bidding deadline of Tuesday, Sept. 13. All bids were well below the \$7,592,600 cost estimated by the project architect, Grant/Pedersen/Phillips Architects of Santa Barbara.

Bidding for the construction of the 64,000-square foot engineering building was the closest ever in more than 20 years said E. Douglas Gerard, executive dean.

"They (the bids) undoubtedly reflect the extremely competitive nature of the construction industry at this time, as

well as an extremely good set of architects' working drawings," Gerard said.

The new structure will be built just north of the Architecture and Environmental Design Building and west of the Robert E. Kennedy Library with a structural steel frame, concrete slab floors and roof, plastered exterior walls, and a drilled-caisson foundation system.

It will provide 216 student laboratory stations and 65 classroom seats. It also will include office space for 50 aeronautical, civil, environmental and mechanical engineering faculty members and administrative offices for Cal Poly's School of Engineering and Technology.

Gerard said it has been designed so

that classroom and laboratory spaces can be modified at relatively small cost to meet the needs of the School of Engineering and Technology as program changes occur.

Contracts for the project will be signed in about four or five weeks, after bids are analyzed. Construction is expected to begin in mid-November and take about 18 months.

Central Coast subcontractors included in the Fisher proposal are Dennis Landscape Co., San Luis Obispo (landscaping); John Madonna Construction, San Luis Obispo (earthwork and paving); Smee's Inc., San Luis Obispo (heating, ventilating, air conditioning, and plumbing); and United Building Systems, Cayucos (prefabricated roofing and siding).

## Drill surprises snoozing scholars Fake fire forces foresighted students to flee

by Shawn Turner  
Staff Writer

Friday, shortly after 3 p.m.: The Robert E. Kennedy Library is quiet—students studying the first week's notes, starting early on papers.

Everything was hushed, everyone mild-mannered. The place was ready for drama.

Drama came—buzzers went on suddenly throughout the library.

"Somebody must be stealing a lot of books," a student told another in the first floor lobby. But the buzzing came not from the electronic gate keepers making sure students don't leave without checking out your material. It came from the fire alarms.

As many as 300 people were evacuated in the 15-minute drill, the library's second since it was built. Except for drills conducted in the residence halls, it was one of the first for what Director of Public Safety Richard Brug called "density areas" on campus. That includes at least seven more buildings taller than two stories that may go

through fire drills this year.

The drill was the result of six months of planning by library officials in conjunction with the Public Safety Department. Charles Beymer, assistant director of the library and emergency control director for the building, said when the first drill was conducted in June, people did not know what to do, but training sessions with the library employees since then have coordinated the event. Officials were assigned to major exits instructing students and faculty to leave the area.

The building itself is designed to do some of the work, said Neile Lincoln, the fire apparatus engineer for public safety. When an alarm is pulled or sprinkler systems go on, both elevators are supposed to descend to the first floors and the doors are supposed to open. Heavy fire doors on the upper floor exits to the main staircase are supposed to slide shut, forcing students to use four emergency stairwells, two on the buildings north side, one on the south and another on the west.

Please see page 5

Mustang Daily—Denise Hubbert

That's no cat-saving ladder that Cal Poly Firefighter Rich Regan is climbing in the picture above. Regan and other campus firefighters participated in Friday's evacuation drill at the library.

Radio in hand, Cal Poly firefighter Bob Salazar provides ground support for the rescue crew.

# Opinion

## Empty helmets

Motorcyclists—what do these items mean to you?

Craniotomy pans. Burr hole drills. Halo traction. Plastic trays.

You don't know? Consider yourself lucky. These are all items that will become very familiar to you if you're ever involved in a motorcycle accident without wearing a safety helmet.

The craniotomy pan is what they'll use on you when you first get to the hospital to pull dirt, gravel, glass and metal fragments out of your brain and attempt to put everything back into its proper approximate location.

They'll use the burr hole drill to make holes in your skull to release blood and fluids to take the pressure off your mashed, swollen brain.

The halo traction is a piece of metal that will be screwed into your head to hold your crushed skull into one semi-solid lump. Finally, they'll use the plastic tray, time and time again, over several months to try and reconstruct those parts of your face that aren't embedded in Highway 1.

While riding a motorcycle is a risky proposition at best, riding without a good, dependable full-face helmet is just plain stupidity, right on par with sex without contraception and drinking while driving.

But while unwanted pregnancies and vehicular manslaughter will continue to rise, motorcycle accidents and fatalities are decreasing in the United States.

The reason? Motorcyclists are starting to use their heads. An increasing number of cyclists are taking motorcycle educational courses, and this is the main reason for the decrease, said Dr. Charles H. Hartman, president of the Motorcycle Safety Foundation. This education includes more skillful riding techniques and, more importantly, safety tips, of which wearing proper protective gear is number one.

But why won't people wear helmets? Do they not want to mess up their hair? Are helmets too expensive, too inconvenient, too confining, too troublesome?

None of these reasons sounds very convincing when you hear the burr hole drill whirring near your ear. Don't be stupid.

## THE POLITICAL CONTORTIONIST

### The Last Word:

It's all going to work out...

The weather all summer was good. You were making money or if you weren't, the beach didn't cost much anyway. Studying was something to worry about in three months. Two months. One month. One week...

Suddenly summer is over. You're broke after books and registration fees, and October rent is coming up. Your tan is fading. You're enrolled in senior project. You have six units. Your subleasees thrashed your apartment. Your boyfriend graduated.

Life sucks?

Wrong. College students perhaps more than anyone suffer seasonal blues at the beginning and the end of each quarter. And while the hassles of college are not going to disappear overnight, a break could make the situation less traumatic and easier to cope with.

I went to the grocery store and picked up my favorite picnic munchies.

Up and down the aisles, I looked for the most scrumptious items. French bread, butter, cheese, liverwurst, Diet Coke and animal crackers were the finer selections.

My next step was to pick up my best friend, who happens to be my boyfriend, too.

We hopped into his orange Honda and

traveled up Highway One toward Morro Bay.

We parked the car, and because it was pouring rain, sat back with the radio on. We listened to Crosby, Stills, and Nash because the texture of the music made us more relaxed.

Just looking at the seals and otters rolling around, taking life easy, enjoying their clam shells as much as I enjoyed my animal crackers, gave me the opportunity to appreciate everything I have: friends, education, beach, country, and a family that provides inspirational and financial support while allowing me independence.

We talked and laughed and used our smile muscles a lot.

The afternoon gave me a better perspective and an uplift that was badly needed. Not that my problems are gone, but they sure seemed less devastating.

Take a break. Call your boyfriend. Ignore your checkbook. Eat a peanut chocolate cluster.

Somehow we all survive. And admittedly we sometimes enjoy it. Playing the game of growing up and going to school is one we'll all eventually win.

## Poly in fine form with new media director

by Caroline Paras  
Staff Writer

Judy Philbin has found a way to combine two job opportunities into one.

Philbin serves as Cal Poly's new ASI information director. Part of her duties include publicizing Poly activities, but the majority of the time she will serve as a "resource" to Cal Poly's 300 clubs and organizations.

"I see my work as somewhat educational—a sense of teaching the different (student) groups and organizations how to understand what they need to get their event publicized," Philbin said.

The Cal Poly graduate started her new position September 1. Since then she has discovered many ways to fulfill her role as information director.

Philbin not only works with the different student organizations, but also with the Associated Students Inc. She serves as the liaison between the ASI and the county's media.

Philbin graduated from Cal Poly with a degree in home economics. Her first job was at Cuesta College, where she worked in the food nutrition program.

While there, Philbin noticed the program did not have an effective promotion plan for getting news out to the community. She stepped in and developed an effective media campaign for the program.

She has also worked at various radio stations such as KZOZ and KCBX, doing food and nutrition pro-

grams and public-service interviewing. Philbin has also taught courses in nutritional science.

Other projects in which Philbin has participated include: publicity director for the San Luis Obispo Mozart Festival, and marketing director for Impact Publishers Inc.

Philbin said her love of the college atmosphere has brought her back to Cal Poly.

"I really enjoy working with students...This gives me a good blend of working with students without being in a classroom. I also like working with the media...and enjoy working in the area of promotion," Philbin said.

Philbin is working with students to plan an ASI calendar of events. She said most of the work will be done by the students.

"The students will write their own releases and what I would do is send it out (to the various media) from my office," she said.

Philbin said one reason most of the university's media releases go through her office is to prevent duplication of events—and to make sure all information about an event is listed in the release.

Because her position is a part-time one, Philbin prefers that students actually write up their own release before coming to her office. She said after the student has written a release, she can go over the material with the student and assist in sending the release out to the community.

## A new kind of study break: Library evacuation drill

From page 1

Only the elevators which did not descend until the second floor fire door which did not close all the way failed. Otherwise, Lincoln said, the drill went smoothly.

Beymer and Lynne Gamble, assistant to library director David Walch, also reported "no running, no panic" in the drill. Students filed out onto the building's front lawn and steps, waiting to get back in.

"One thing students should know about is that they can come back inside the building after the drill, so they can leave their stuff inside," said Gamble.

Mike Henry, an equipment technician from the audiovisual department and the culprit who pulled the fire alarm, later turned up the volume on the third and fourth floor buzzers that his machines said weren't loud enough. The alarm did not go off in the first floor computer work room.

Lincoln, who said he saw no physically handicapped people in the drill, pointed out that "sanctuary points" are designated on the upper floors for handicapped people. All of them are study rooms marked by the blue handicapped international symbol, and students are to remain in those rooms until fire officials can rescue them.

Library officials reported only a few problems with people. Dorothy Stechman, who works in the Special Collections and Archives department, said that some students whom she asked to leave made a game of it and hid from her.

Dave Hickman, the circulation supervisor, said some students left the library without checking out materials. "Three people returned after the drill to correct the error," and Hickman said, "I hope the rest are honest."

And some students were locked out of the upper floors for several minutes before the fire doors were opened.

## Correction

The Student Senate did not formally endorse the proposed Course Evaluation booklet of the ASI, as reported in Friday's *Mustang Daily*. The ASI will go ahead with implementation of the booklet; ASI Academic Coordinator Sue Turner merely informed the senate of plans for the booklet at the first senate meeting. We are sorry for any misunderstandings the story may have caused readers.

## Get down to business faster. With the BA-35.

If there's one thing business students have always needed, this is it: an affordable, business-oriented calculator. The Texas Instruments BA-35, the Student Business Analyst.

Its built-in business formulas let you perform complicated finance, accounting and statistical functions - the ones that usually require a lot of time and a stack of reference books, like present and future value

calculations, amortizations and balloon payments.

The BA-35 means you spend less time calculating, and more time learning. One keystroke takes the place of many.

The calculator is just part of the package. You also get a book that follows most business courses: the *Business Analyst Guidebook*. Business professors helped us write it, to help you get the most out of calculator and classroom.

A powerful combination.

Think business. With the BA-35 Student Business Analyst.

Mayor Melanie Billig

## Mayor addresses

by Scott Swanson  
Managing Editor

Housing is a definite problem in San Luis Obispo, but it is not entirely the city's fault that the situation is what it is today, San Luis Obispo Mayor Melanie Billig said Monday.

Billig told a Cal Poly journalism class that many of the problems students face in San Luis Obispo are common in any university town.

"I think that students have to understand that this is very typical of any university community you walk into," Billig said. "Most all of them have parking problems, water problems, housing problems."

According to Billig, San Luis Obispo is doing its best to solve the problems posed by the Cal Poly student population. But she defended the city's no-growth policies, stating that the predominant view in San Luis Obispo is slow, managed growth and infill growth as opposed to expanding the city through annexation.

"The city has approved a number of housing units (apartment complexes) but because they are private enterprises and because of the recession, all we can do is approve," she said. "There's nothing we can do about building housing ourselves."

Billig cited the Mustang Village expansion as an example.

"The Mustang project has hit some snags in the last few years," she said. "But it looks like it is finally getting off the ground now."

Cal Poly needs more on-campus housing, according to Billig, but she was not optimistic about that possibility.

## housing problem

"The housing issue will not be solved overnight," she said. "A Greek Row is a need, but the (California State University) trustees wouldn't go along. Married housing is also a need."

San Luis Obispo's housing problems would be less severe if Cal Poly had grown in a slower, more uniform manner in the last two decades, Billig said.

She said that there was no way San Luis Obispo could keep up with the school when it doubled in size beginning in the 1960's.

"If Cal Poly hadn't mushroomed so quickly, the community might have kept up," Billig said. She said that the city doesn't like the problems any more than the students do.

Billig said that if Cal Poly sticks to the master plan and keeps the student population at 16,000, the city will at least be able to plan and try to develop answers for the present problems.

Billig said that one bridge she has tried to build while she has been mayor the last two years is better understanding between the city and the university. She said she meets regularly with Cal Poly President Warren Baker to try and address the problems between the city and Cal Poly.

"We're a very old community," she pointed out. "There are 16,000 of you in a city of over 35,000. That makes a tremendous impact on the community."

Billig said that the students are the most active element in the community.

"How you handle yourself makes an impact on how they receive you," she said. "It's important for people in the community not to make rash judgements on students."

## Get to the answers faster. With the TI-55-II.

What you need to tackle the higher mathematics of a science or engineering curriculum are more functions — more functions than a simple slide-rule calculator has.

Enter the TI-55-II, with 112 powerful functions. You can work faster and more accurately with the TI-55-II, because it's preprogrammed

to perform complex calculations — like definite integrals, linear regression and hyperbolics — at the touch of a button. And it can also be programmed to do repetitive problems without re-entering the entire formula.

Included is the *Calculator Decision-Making Sourcebook*. It makes the process of using

the TI-55-II even simpler, and shows you how to use all the power of the calculator.

Get to the answers faster. Let a TI-55-II show you how.

## SCHOLARSHIPS

**THE NATIONAL ENDOWMENT FOR THE HUMANITIES** announced a new grant program for students under 21, the Younger Scholars Program. The grants will enable students to carry out their own non-credit humanities research projects during the summer of 1984. The program will award 100 grants for outstanding research and writing projects in such fields as history, philosophy, and literature. Application deadline is November 15. Guidelines and application instructions are available through the *Younger Scholars Guidelines, Room 426, The National Endowment for the Humanities, Washington, D.C., 20506*. Award recipients will be expected to work full-time for nine weeks during the summer, researching and writing a humanities paper under the close supervision of a humanities scholar. This is not a financial aid program, and no academic credit should be sought for the projects.

## RANCH TRIP

ASI Outings is sponsoring its 13th Annual Ranch Trip to a ranch near Monterey. The trip provides an opportunity to meet new people, eat great food, make ice cream, bike, swim, spa, and try out the "ropes course." The \$15 cost includes food and transportation. To sign up and for further information stop by the Escape Route.

## CRAFT CLASSES

Hey you crafty people! There are still some excellent craft classes available through the Craft Center. Included are courses in ceramics, quilting, bike repairs, basketweaving. Come by the Craft Center to sign up.

## CHRISTIAN CONCERT

Join the Wesley Foundation for an evening of inspirational Christian Folk music with Bob Morley. The guitar concert is Sept. 29 at 7:30 in the San Luis Obispo United Methodist Church.

## OUTINGS

**THE V.I.P.'S—Vegetarian Inclined Persons**—will sponsor a weekend trip to Murieta Hot Springs Health Spa, located between Elsinore and San Diego. The date has not been set, but the group is planning to take 20 people on the three-day, two-night trip. The cost should be \$66 per person, and will cover a room at double occupancy, two breakfasts, two dinners, one lunch, whirlpool, regular pool, one mineral bath, one body wrap, use of the pool, sauna, and other activities. Interested students can call Dorothy at 489-5481.

## DANCE AUDITIONS

Every Tuesday and Thursday from 5 to 7:30 p.m. the Orchesis Dance Club and interested dancers are invited to attend and tryout for October 4 auditions. Practice takes place in the Crandall Gym dance studio.

## ASI SENATE OPENINGS

The School of Communicative Arts and Humanities Council will consider candidates for the two vacant A.S.I. Senate positions. Students interested in being appointed for the senate positions should attend the weekly meetings of the council, held Tuesdays from 6 p.m. to 7:30 p.m. in University Union room 218. For more information, contact council member Lars Perner at 466-3105.

## SCUBA CLUB

The Scuba Club will hold their first meeting of the year Thursday Sept 29 at 7:30 p.m. in the faculty dining hall, room D. Previews of upcoming events, including Baja and Catalina trips and a treasure hunt night-dive. New members are welcome.

## HEALTH

**CENTRAL COAST HELP—THE HERPES SUPPORT GROUP** will meet the first Thursday of each month at the San Luis Obispo County Health Department, (across from General Hospital) at 2191 Johnson Ave., San Luis Obispo. The meetings will begin at 7 p.m. in the conference room. For more information, call Wendy at 549-5540 (between 9 a.m. and 5 p.m.) or Victoria at 928-3081 (after 6 p.m.).

**A MONTHLY CPR CLASS**, sponsored by the American Heart Association and French Hospital, will be held in the French Hospital Auditorium Oct. 4 and 6. The class will run from 6:30 p.m. to 9:30 p.m. both nights and will cost \$1. Skills taught will include single rescuer CPR, two-person rescue, choking and infant CPR. Basic information will also be given about the heart, heart attack, how to recognize a heart attack and who to call for help. Continuing education credits are available for professionals. Registration is required and those interested should call 543-5353, ext. 301.

**THE RAPE CRISIS CENTER** of San Luis Obispo County offers a hotline for victims of sexual abuse, assault, or battery. The number is 543-RAPE; trained advocates staff the lines offering assistance for victims in making informed choices, answering questions about police response, medical examinations, and court procedures. The shelter can provide food, clothing, shelter, transportation and a friendly caring hand to guide victims through their ordeals. The Rape Crisis Center provides direct services to victims of sexual assault and domestic violence on a 24 hour basis.

**THE WOMAN'S RIGHTS HANDBOOK**, a fully updated edition with detailed sections on employment, rape, and other violent crimes, domestic relations, health care, housing and education is now available from the Attorney General's office. Copies of the handbook can be obtained by writing the Attorney General's Public Inquiry Unit, 1515 K Street, Suite 511, Sacramento, CA 95814. Attorney General John Van De Kamp said the purpose of the booklet is to provide the most current information on laws affecting women, and a current

listing of referral services for emergency use. The handbook marks the first time the entire publication has been rewritten to reflect significant changes in the law.

## MEETINGS

**SENIOR OUTREACH PROGRAM** OF SLO staffer Charlotte Whitaker will give a speech entitled "Wellness in Aging" at a meeting of the Vegetarian Inclined Persons, Oct. 3, 6:30 p.m., at the Arroyo Grande Community Center, 211 Vernon St. Preceding the speech will be a potluck dinner; participants should bring a dish (vegetarian please) which serves six, along with their own utensils.

**ARROYO GRANDE CLASSES** sponsored by the Rec. Dept. will meet on Thursdays starting Sept. 29 at the A.G. Community Center at 211 Vernon Ave. Classes will meet from 7:30-9 pm and students are asked to not wear hard-soled or leather-soled shoes.

**SAN LUIS OBISPO classes** sponsored by Mu Delta Phi, the Cal Poly Pre-health professions club, will meet on Thursdays starting Sept. 29 at the

S.L.O. Vet's Hall on Grand Ave. Beginning and advanced classes will meet from 7:30-9 pm.

**MORRO BAY CLASSES** sponsored by the Rec. Dept. will meet on Mondays starting Oct. 3 at the Morro Bay Vet's Hall on Surf St. Beginning and advanced classes will meet from 7:30-9 pm.

**THE CAL POLY CLASSES** sponsored by Mu Delta Phi, the Cal Poly Pre-health professions club, will meet on Mondays starting Oct. 3 in Mustang Lounge. Beginning and advanced classes will meet from 7:30-9 pm.

## POLY GYMNASTICS

The Cal Poly Gymnastics Club will meet and workout every Monday and Wednesday evening throughout the quarter from 5:30 to 7 p.m. in Crandall Gym. The club is open to all students—with or without gymnastics experience. Club dues are \$5 per quarter, \$10 per year. Interested gymnasts can call club president Christofer Sommer at 544-6731 for more information.

# Economics 101: Get your Student Loan from Great Western.

Great Western Savings now offers California Guaranteed Student Loans for as much as \$2,500 a year, and even \$5,000 for graduate study.

Our Guaranteed Student Loans come with guaranteed service. When you apply, you get an answer within thirty days. And you get your money fast, because Great Western is a major California lender.

The low interest rates mean monthly payments will be comfortable, even during the first few years after school. You can pay nothing while you're in school, and there is even a grace period

when you graduate.

Great Western lends to California residents and nonresidents, as long as the school is in California. Freshmen and half-time students are also eligible. You can even get a loan from Great Western if you already have a Student Loan from another lender.

The lesson is simple: apply for a loan through Great Western. Just fill out the form at your Financial Aid Office and send the application to this address:

Great Western Savings  
Student Loan Department  
P.O. Box 1050  
Northridge, California 91328

## Recreational Sports

Tired of living vicariously through the sports pages? Have you always secretly wished to experience the deep emotional satisfaction of spiking a football after dashing 80 yards for a touchdown? Or are you just bored?

The Cal Poly recreational sports program may be your "Fantasy Island." At no cost. But there are meetings to be attended before your exploits on the field will be appreciated. Following is a list of these necessary, uh, I mean meetings:

Sept. 27 (tonight)	Touch football	Fremont Hall Lounge	6 p.m.
Sept. 27	Football referees	Fremont Hall Lounge	7 p.m.
Oct. 3	Innertube water polo	Science North 202	6 p.m.
Oct. 3	3 on 3 basketball	Science North 202	7 p.m.
Oct. 3	Volleyball (men and women divisions)	Science North 202	8 p.m.
Oct. 3	Softball	Science North 202	9 p.m.

These meetings don't require the whole team, only a representative. Maybe you can draw straws. If you're "unattached" drop by and a team might be found with an opening.

Also, the intramurals office will be closed this weekend beginning Friday at 4 p.m. Program director Dave Ciano is hauling his 60 or 70 employees up to Cambria for a retreat. And it's only the second week.
